

When Safety is your prime Concern

SPIRAMED[®]

Spiramycin 3.0 M.I.U Tablets

The Safest Antibiotic...

- Safest Antibiotic during Pregnancy and Lactation
- Has great affinity to tissues & achieves concentration much higher than serum levels
- Broad Spectrum of activity, effective against aerobic as well as anaerobic organism including E.coli and klebsiella
- Has substantial post antibiotic effect
- Spiramycin tissue concentrations are well above the MIC for the most sensitive organisms, especially in the Fallopian tube, which is clinically very important for the treatment of chlamydia pelvic inflammatory disease
- Does not produce gastro-intestinal motility stimulation
- Favorable safety and tolerability
